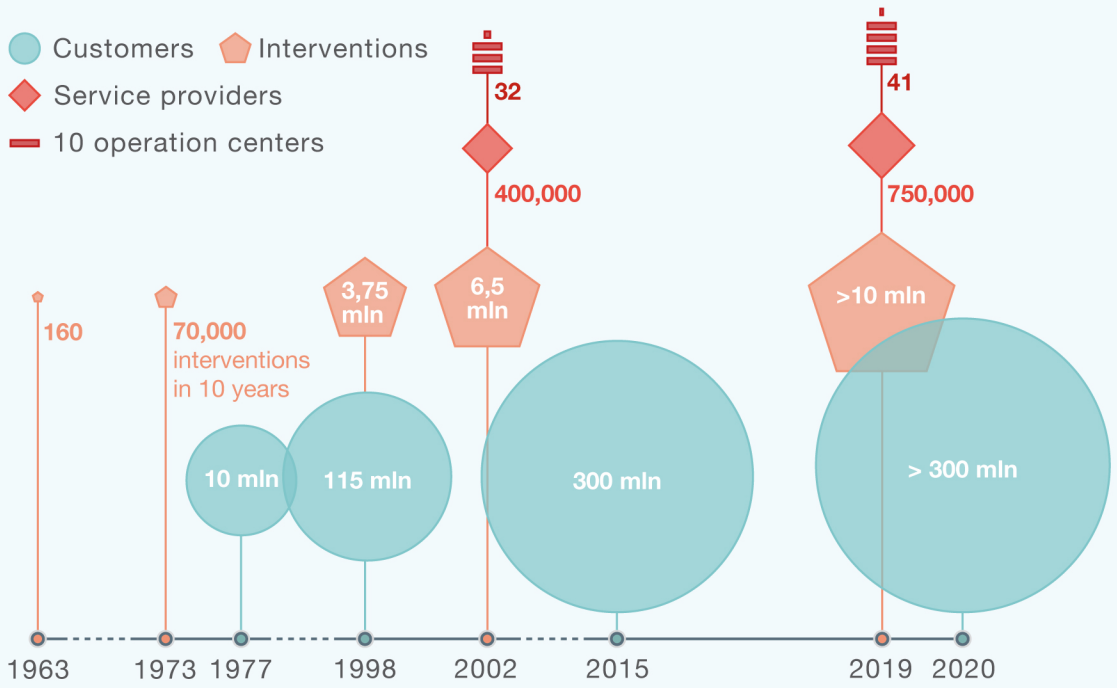
Europ Assistance global statistics



Europ Assistance was founded in 1963 in Paris as an organisation to help people in need away from home, offering state-of-the-art medical assistance.
The revolutionary idea of its **founder Pierre Desnos** today translates into "**making customers' lives easier every day**", providing services that meet their needs in all life's circumstances, **anytime, anywhere**, tackling the most difficult challenges such as the rescue in 1993 of the skipper Paolo Rizzi, along with Andrea Pribaz, caught in a storm seven hundred miles from the Azores. Europ Assistance has made it possible to radically innovate the range of services offered by the Group and has become a trusted partner for millions of families and large companies, offering **prevention and personalised assistance solutions all over the world in sectors such as travel, mobility, health, home and family, and cyber and digital**, also integrating them with insurance coverage and always **taking advantage of the most modern technologies**.
